

## Control and charge for printing

## with Print Director Pro

### Benefits

Track paper output on printers, photocopiers and multifunction devices.

Recover costs – charge for printing.

Reduce waste

Discover optimal deployment of printing facilities.

Better supplies management

Control access to office equipment

Centralise management of printing infrastructure

### Charge for printing

- Accept cash from users to replenish their accounts. Printing is denied when their balance reaches zero.
- Users can see their balance on their workstation or on the LCD panel of the printer.

### Extensive graphical reporting

- Summary and detailed information with usage analysis.
- Automatic, scheduled emailing of reports in Excel, PDF or Word formats.
- Up to 3 levels of grouping by any attribute (User, Device, Department, Region...)

### No extra hardware

- Embeds on to Konica Minolta and Lexmark devices.

### 'Follow Me' printing

- Print and then release at any device.

### Google Cloud Print Integration

- Print from Android, iOS, Windows, Chrome from anywhere in the world and have your documents routed into your 'Follow Me' printing system.

### 'Follow Me' printing system.

- Silent auditing of device usage.
- Secure print release and follow me (release at any device).
- Offline operation if connection to central database is lost (very effective in WAN environments).
- Extensive rules enforcement on a per user basis (access to devices, colour printing, max pages, etc).

- Reports can be automatically emailed to a number of recipients at user-specified intervals.

### Rule based printing and alerts

- Limit users and/or devices when certain thresholds are met per month, week, day or any calendar period.
- Educate users via popups or emails with advice on duplex or black & white printing.
- Alert management via email when certain user or device, total or colour thresholds are met.
- Automatically change email print jobs to black & white or large print jobs to duplex.

### Administrative automation

- Integration with Active Directory.
- User defaults (Rules, software access) automatically inherited from their Department.
- Send user PINs directly from software.
- Auto-load user email address for Scan-to-Me. No need to manually load device address books.
- Offline operation if connection to central database is lost (very effective in WAN environments).
- Silent auditing of device usage.
- Secure print release and follow me (release at any device).
- Offline operation if connection to central database is lost (very effective in WAN environments).
- Extensive rules enforcement on a per user basis (access to devices, colour printing, max pages, etc).
- Reports can be automatically emailed to a number of recipients at user-specified intervals.
