

Control print & copy usage with

Print Director Manager

Benefits

Control paper output on printers, photocopiers and multifunction devices

Recover costs, conduct internal billing

Reduce waste

Discover optimal deployment of office equipment

Better supplies management

Control access to office equipment

Centralise management of printing infrastructure

Flexible environments

- Supports all printing environments including print servers (spooled printing), desktop printers, direct-to-IP printing and Google Cloud printing.

Extensive graphical reporting

- Summary and detailed information with usage analysis.
- Automatic, scheduled emailing of reports in Excel, PDF or Word formats.
- Up to 3 levels of grouping by any attribute (User, Device, Department, Region, Phone number)

'Follow Me' printing

- Print and then release at any device.

Google Cloud Print Integration

- Print from Android, iOS, Windows, Chrome from anywhere in the world and have your documents routed to your corporate 'Follow Me' system.
- Silent auditing of device usage.
- Secure print release and follow me (release at any device).
- Offline operation if connection to central database is lost (very effective in WAN environments).
- Extensive rules enforcement on a per user basis (access to devices, colour printing, max pages)
- Reports can be automatically emailed to a number of recipients at user-specified intervals.

No extra hardware

- Embeds on to Konica Minolta and Lexmark devices.

Rule based printing and alerts

- Limit users and/or devices when certain thresholds are met per month, week, day or any calendar period.
- Educate users via popups or emails with advice on duplex or black & white printing.
- Alert management via email when certain user or device, total or colour thresholds are met.
- Automatically change email print jobs to black & white or large print jobs to duplex.

Administrative automation

- Integration with Active Directory.
- User defaults (Rules, software access) automatically inherited from their Department.
- Send user PINs directly from software.
- Auto-load user email address for Scan-to-Me. No need to manually load device address books.
- Offline operation if connection to central database is lost (very effective in WAN environments).
- Silent auditing of device usage.
- Secure print release and follow me (release at any device).
- Offline operation if connection to central database is lost (very effective in WAN environments).
- Extensive rules enforcement on a per user basis (access to devices, colour printing, max pages, etc).
- Reports can be automatically emailed to a number of recipients at user-specified intervals.
